DWA_04.3 Knowledge Check_DWA4

---

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.
   a) Use const for all of your references; avoid using var. This ensures that you can't reassign your variables, which can lead to bugs and difficult to comprehend code.
   b) Use line breaks after opening array brackets and before closing array brackets, if an array has multiple lines. The code will be easier to read and understand.
   c) Use object destructuring when accessing and using multiple properties of an object. Destructuring saves you from creating temporary references for those properties, and from repetitive access of the object. Repeating object access creates more repetitive code, requires more reading, and creates more opportunities for mistakes.

---

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.
   a) Strings that cause the line to go over 100 characters should not be written across multiple lines using string concatenation. It is much easier to read small multiple lines than one long line.
   b) Do not include JavaScript filename extensions when importing. This is confusing to me because when you import a file you want to know what type of file you are importing
